A true 4th generation product specifically designed from the outset to meet the demands of modern control centre and resource management applications.

What? Where? When? Why? A powerful and flexible but easy to use rules engine to meet the most demanding response plan requirements.

Resque 4i provides Emergency Services with increased economic and efficiency benefits, made available through sharing control centre resources and the provision of fall back 'buddy' arrangements, across multiple partner agencies, ensuring continued quality of service.

**RESQUE 4i FEATURES INCLUDE:**

- Multiple Agency response plan flexibility
- Resource attribute and location based response
- Integral road network management
- AddressBase Premium™ gazetteer compatibility
- Integral system management and statistics reports
- Multiple gateway options
- Standards based REST interface
- Operating system and database agnostic
- High resilience system architecture
- Multi lingual
