## Remsdaq Wins Innovation, Technology & Enterprise Award at Flintshire Business Awards 2019

The thirteenth annual Flintshire Business Awards were celebrated recently at an award ceremony at Soughton Hall. The Awards, whose headline sponsor was for the tenth year AGS Security Systems, recognise excellence and outstanding performance by businesses across the county.

Remsdaq won the Innovation, Technology & Enterprise category, sponsored by Kingspan Insulated Panels and were one of nine winners on the night. The exclusive black-tie award event was attended by more than 200 influential businesspeople, celebrated the success of Flintshire companies from a range of industries.

Remsdaq won the award for their EntroPad range of access control readers, keypads and request to exit buttons which have antimicrobial protection built in. The EntroPad range is designed to reduce contamination in clean environments including hospitals, laboratories, surgeries, food manufacturing & preparation companies and works with any Wiegand-compatible access control system. Third party testing to ISO 22196:2011 proves the integral antimicrobial protection on the new EntroPad devices kills up to 99.99% of E. coli and Staphylococcus aureus bacteria over a 24-hour period.

Robin Koffler, sales and marketing director at Remsdaq says: "We are thrilled to win the Flintshire Business Award as recognition of our agile innovation strategy, allowing us to rapidly develop products for specific niches which are then manufactured at our Deeside facility."
